

Table S4. Original and adjusted emotion differentiation scores.

	Positive Emotions		Negative Emotions	
	<i>Participants with MDD</i>	<i>Control Participants</i>	<i>Participants with MDD</i>	<i>Control Participants</i>
Differentiation	0.57 (0.21)	0.54 (0.18)	0.51 (0.22)	0.64 (0.27)
Differentiation (adjusted)	0.65 (0.15)	0.68 (0.14)	0.39 (0.21)	0.55 (0.16)

Note: Adjusted scores indicate levels of emotion differentiation after controlling for intensity and temporal variability.

MDD = Major Depressive Disorder
